

Reduce your company's environmental impact

Recycled paper has moved on tremendously since the days of greyish, poor quality substrates. Many consumers also expect businesses to be environmentally responsible.

Today, *Shetland Times Printing* source recycled papers that offer almost everything that a paper produced from virgin fibres can.

The huge benefit, of course, is the low impact these papers have on the environment, but you can also take advantage of our competitive recycled paper prices too!

The UK currently generates approximately 4.7 million tonnes of waste paper a year. By choosing a recycled stock that incorporates some of this recovered paper, we can help you improve your organisation's environmental credentials.
