PRODUCT INFORMATION

Roll-Up Banners

Pull-up banners are easy to assemble, durable, portable and make clear the guidelines you wish customers and employees to follow in any retail or working environment.

Floor Stickers

The floor graphics we produce are ideal for plotting a safe route for shoppers to best suit individual business needs. They help establish recommended distancing guidelines. Our stickers are created from self-adhesive, easy to apply vinyls with a durable, slip resistant finish.

Flexi Signs

Double-sided flexi-signs are sure to get your message noticed. They are designed to withstand the weather, are lightweight and easy to assemble making them great for temporary signage. Comprised of a sturdy aluminium frame, water weighted base and supplied with double-sided anti-glare poster covers. Please note internal A1 posters (594 x 841mm) need to be ordered separately. Frame: 600mm (w) x 1010mm (d). Base: 600mm (w) x 200mm (d).

Window Decals

Window stickers are the perfect method for displaying important information prior to entering your premises including opening hours and safety advice. Choose from a clear, white block out or one-way vision vinyls depending on your preference or needs. Please note the one-way vision vinyls are placed on the outside of windows, the clear and white block out are for the inside of windows.

A2/A1 Posters

Posters in these large formats (420 x 594mm / 594 x 841mm) are highly visible and make your safety messages extremely clear to both customers and employees. There are paper and "tearproof" options available, the latter being more durable and re-usable.

A4 Leaflets

Desktop display leaflets can draw attention to the regulations and instructions you would like customers to follow and can also be used as smaller posters to remind your employees to continue following the health and safety advice throughout your premises.

NOTE: Ensure the floor surface is clean from contamination, dust free and dry before applying floor graphics. Make sure edges are applied well. Allow 24 hours to cure before being exposed to moisture or cleaning. Avoid exposure to heavy traffic. If edges of graphics begin lifting, replace graphics immediately to avoid the risk of tripping hazard.
